

IoT SMS X -Series is a powerful monitoring host for data center power and environment, this product with one-stop high extensibility design, have dual power supply sustainable navigation, which especially suitable for power and environment monitoring of middle-small single computer rooms; IoT SMS X-Series can monitor multiple smart devices (UPS, power distribution, precision air condition etc) in one device, at the same time it can extend environment monitoring like Temp&Humid, water leakage, smoke, door contact, infrared detection; IoT SMS X-Series support multiple alert ways like 3G, SMS, LINE Notify, sound light, voice dialing, email etc, it is your ideal choice for data center management.

Advantages

- Support monitoring of power equipment;
- Support monitoring of air condition equipment;
- Support monitoring of data center environment;
- Support link of security system;
- User friendly interface that is easy and convenient for use;
- Perfect history record;
- Support Modbus RTU Series and Modbus RTU TCP
- Built-in WEB server to achieve HTTP access;
- Multiple compatibility of various brands and types of UPS, precision air condition, precision power distribution cabinet, generator, etc;
- option rechargeable battery which can be continuous running for 4 hours when power outage;
- Support history events and data storage 2000 events
- Support to extend 8 channels of dry contact signal input (Such as smoke, water leakage, door contact, etc);
- Support to extend 24 channels of temperature and humidity detection and 4 general air condition infrared control;
- Support sound light alarm, SMS, E-mail alarm and LINE Notify;
- Support multiple users authority management;
- Support DHCP;
- Support scheduled task;
- Support WEB page configurations;
- Support network upgrade, Serial upgrade.
